MATERIALS

and their **PERFORMANCES**

SHOWA offers a wide range of liner materials and coatings.

Compare the strengths and drawbacks of each then choose the compositions that best meet your needs!

COTTON

Natural cellulose fiber. Flexible, soft and non-irritating, it protects against mechanical aggression (impacts, low vibration, iron filings, splinters, glass fragments), absorbs perspiration and gives you great comfort when wearing dipped protective gloves continuously. Cotton fibers are mixed with polyester fibers in order to associate comfort with a higher mechanical resistance and more elasticity.

NYLON

A lightweight elastic polyamide which is largely lint-free and washable, dries quickly and is resistant to abrasion and deformation. Mixed with cotton and acrylic, it makes the glove more flexible and extends its lifetime.

ACRYLIC

Soft, warm, insulating fiber that is resistant to water, common solvents, acids and weak alkalis. Abrasion resistant. Often mixed with cotton to make the glove more lightweight.

HPPE

High performance polyethylene is flexible, light and durable. As resistant to cutting as para-aramid fibers but provides more resistance to abrasion. Resistant to chemicals, particularly solvents.

ARAMID

Lightweight, supple, comfortable, washable fiber that provides effective protection from cuts (above level 5 with stainless steel reinforcing) and from convective heat. Aramids offer durability and performance that far exceed that of leather (up to 5 times higher) and cotton (up to 3 times higher).

ENGINEERED FIBERS

High-tech composite blends stainless-steel wire core with HPPE or ARAMID fibers for exceptional protection against cuts from sharp edged materials.

COATINGS & POLYMERS EXPLAINED

Naturally occurring and man-made polymers are essential building blocks of hand protection. Specific polymers protect workers from specific hazards. That's why SHOWA utilizes a variety of polymers and coatings, delivering **hand protection for every pursuit**.

	STRENGTHS	WEAKNESSES
Nitrile Anti-slip vulcanized synthetic rubber	<ul style="list-style-type: none"> + No latex proteins + Excellent abrasion and cut resistance + Three times the puncture resistance of latex + Excellent resistance to oil, grease and hydrocarbons + Resistance to acids, certain organic solvents, pesticides, oils and fuels + Heat resistance (no flame resistance) 	<ul style="list-style-type: none"> ⊖ Relatively rigid ⊖ Normally low tear resistance (N-DEX® gloves are an exception) ⊖ No chemical resistance against ketones and some chlorinated hydrocarbons (methylene chloride and trichloroethylene).
Natural Rubber Natural rubber mainly from latex and the rubber tree	<ul style="list-style-type: none"> + Very flexible and elastic + Very robust, provides secure grip + Excellent abrasion resistance to tearing and bending + Waterproof + Protects against weak acids, caustics, alcohols and detergents 	<ul style="list-style-type: none"> ⊖ Poor chemical resistance against oils, greases, hydrocarbons and organic solvents ⊖ Proteins may cause allergic reaction
PVC <i>(poly vinyl chloride)</i> Economical synthetic thermoplastic	<ul style="list-style-type: none"> + Functional in temperatures ranging from -30°F (-34°C) to 212°F (100°C) + Durable, provides high chemical resistance + Material softened by plasticizer + Good electrical insulator 	<ul style="list-style-type: none"> ⊖ Low resistance to cuts and punctures ⊖ Disposable PVC gloves might have pinholes ⊖ Low resistance to solvents
Polyurethane (PU) Plastic that is micro-porous elastomer	<ul style="list-style-type: none"> + Very flexible and elastic + No latex proteins + Clean - does not shed particles + Good resistance to abrasion and oils + Does not harden in cold or soften in heat + Porous ventilation reduces perspiration 	<ul style="list-style-type: none"> ⊖ Low chemical resistance ⊖ Poor resistance to hot water
Neoprene Polychloroprene synthetic rubber	<ul style="list-style-type: none"> + Flexible in temperatures ranging from -10°F (-23°C) to 300°F (150°C) + Soft like natural rubber, but contains no natural rubber latex proteins + Good abrasion and cut resistance + Chemical protection against acids, alcohols, fats, ketones, organic and inorganic solvents, oils, greases and petrochemicals + Heat resistant and flame resistant + Resists degradation from ozone, sunlight and oxidation 	<ul style="list-style-type: none"> ⊖ Poor grip when wet ⊖ No chemical resistance against chlorinated hydrocarbon solvents
Butyl Synthetic rubber polymer for heavy chemical protection	<ul style="list-style-type: none"> + Very elastic, even at low temperatures + Excellent chemical resistance against gases, ketones (MEK, acetone) and acids + Low gas permeability 	<ul style="list-style-type: none"> ⊖ Limited grip and dexterity ⊖ Poor mechanical resistance ⊖ Poor resistance to aliphatic hydrocarbons, aromatic hydrocarbons and halogenated solvents
Viton Synthetic rubber polymer - the last resort	<ul style="list-style-type: none"> + Protects where nothing else protects + Chemical protection against PCBs + Excellent chemical protection against chlorinated, aliphatic and aromatic hydrocarbons 	<ul style="list-style-type: none"> ⊖ Limited grip ⊖ Limited dexterity ⊖ Not suitable for ketones, esters and nitro compounds

POLYMER COMBINATIONS: THE BEST OF BOTH WORLDS

Certain combinations of polymers are used to make hybrid gloves. Neoprene over natural rubber latex is used in SHOWA® CHM and CHMY gloves. Viton over Butyl is used to make the highly chemical resistant SHOWA 890 and 892 gloves. Nitrile is used as an over-dip in several SHOWA natural rubber gloves to provide added resistance to aging, ozone and chemicals.

SINGLE USE

[Disposable Heroes]

As a pioneer of disposable hand protection, SHOWA offers the most extensive range in our industry. Beginning with the world's first nitrile glove, we've continuously innovated to meet the demands of varied trades and professions.

NITRILE

N-DEX®
7005/PF*

The world's first 100% nitrile disposable glove, N-DEX 7005 provides unmatched performance across a range of tactical applications. Available lightly-powdered (7005) or powder-free (7005PF).

KEY BENEFITS

- + Decreased risk of allergies
- + Superior durability & versatility
- + Limited chemical protection
- + Second-skin fit & feel
- + Rolled cuff keeps debris out

POLYMER Nitrile Low-modulus	THICKNESS 4 mil
LINER Disposable	LENGTH 9.5 inches
GRIP Smooth	COLOR Light blue

PACKAGING

S	M	L	XL	XXL
---	---	---	----	-----

100 gloves per dispenser
20 dispensers per case

N-DEX®
6005PF

Powder-free, 4-mil, 9.5-inch, disposable low-modulus nitrile glove for those seeking single use protection in critical environments.

KEY BENEFITS

- + Decreased risk of allergies
- + Easy to put on and remove
- + Tear-away feature in case of emergency break
- + Second-skin fit & feel
- + Rolled cuff keeps debris out

POLYMER Nitrile Low-modulus	THICKNESS 4 mil
LINER Disposable	LENGTH 9.5 inches
GRIP Smooth	COLOR Light blue

PACKAGING

----	---	---	---	----

100 gloves per dispenser
20 dispensers per case

N-DEX®
6105PF

Combining trusted N-DEX protection with Eco Best Technology® (EBT), N-DEX 6105PF with EBT is the **world's first biodegradable disposable nitrile** glove. This powder-free, 4 mil, 9.5-inch, low-modulus nitrile glove performs the same as non-EBT nitrile disposable glove.

KEY BENEFITS

- + 100% biodegradable
- + Decreased risk of allergies
- + High performance protection
- + Second-skin fit & feel

POLYMER Nitrile w/ EBT Low-modulus	THICKNESS 4 mil
LINER Disposable	LENGTH 9.5 inches
GRIP Smooth	COLOR Green

PACKAGING

XS	S	M	L	XL
----	---	---	---	----

100 gloves per dispenser
20 dispensers per case

Eco Best Technology®

Protection & Preservation in **ONE**

Our Eco Best Technology (EBT) is the breakthrough innovation that gave rise to the world's first fully biodegradable nitrile glove. EBT is composed of organic materials that accelerate the biodegradation of nitrile in biologically active landfills. It helps preserve our planet without ever sacrificing performance.

[100%]
BIODEGRADABLE

Protecting What Matters

Protection is our first priority. With SHOWA's revolutionary Eco Best Technology® (EBT), we not only provide top of the line hand protection, but also a means of protecting our planet for generations to come.

0
ENVIRONMENTAL IMPACT

Plant Food

EBT products are rich nutrient sources that attract microbial activity in landfills. Upon disposal, microorganisms consume, metabolize and break down EBT materials into fertilizer, leaving zero waste behind.

ASTM ASTM
D5526 D5511

Proven Performance

Help preserve the planet without sacrificing performance. EBT gloves perform exactly the same as our non-EBT gloves, as proven by third party testing in side-by-side evaluations.

The Planet is in Your Hands

Consider the number of disposable nitrile gloves used every day. Each one takes over 100 years to fully break down. With EBT, they return to organic matter in only 1-5 years*, creating a world of difference in every glove.

Biodegradation Process

SHOWA N-DEX[®]

One of SHOWA's most notable innovative firsts, the groundbreaking innovation of low-modulus nitrile, natural rubber latex free hand protection. This innovation was patented in 1991 and set the bar for all others to follow. N-DEX[®] hand protection is recognized globally as the answer to protecting the millions of humans that are severely allergic to natural rubber latex.

Expanding on the innovation, SHOWA launched the world's first accelerator free, hypo-allergenic, low-modulus nitrile glove.

The latest addition to the N-DEX family of products is the world's first bio-degradable glove, SHOWA N-DEX 6105PF with EBT[®]. Eco Best Technology[®] (EBT) is a patented solution to the massive amounts of gloves that are discarded in landfills. Please read more about EBT on page 7.

NITRILE

N-DEX® 6205PF

Powder-free, 4-mil, 9.5-inch, disposable low-modulus nitrile glove. **Supports breast cancer research.***

KEY BENEFITS

- + Decreased risk of allergies
- + Easy to put on and remove
- + Tear-away feature in case of emergency break
- + Second-skin fit & feel
- + Rolled cuff keeps debris out

POLYMER Nitrile Low-modulus	THICKNESS 4 mil
LINER Disposable	LENGTH 9.5 inches
GRIP Bisque	COLOR Pink®

PACKAGING

XS	S	M	L	XL
----	---	---	---	----

100 gloves per dispenser
10 dispensers per case

N-DEX® 7700PFT

Powder-free, 4-mil, 9.5-inch, disposable low-modulus nitrile glove. **Accelerator-free formulation.**

KEY BENEFITS

- + Free from common accelerators found in nitrile gloves
- + Even lower risk of allergies
- + Static-dissipative
- + Hides dirt and grime
- + Rolled cuff keeps debris out
- + Second-skin fit & feel

POLYMER Nitrile Low-modulus	THICKNESS 4 mil
LINER Disposable	LENGTH 9.5 inches
GRIP Bisque fingertips	COLOR Black

PACKAGING

S	M	L	XL
---	---	---	----

50 gloves per dispenser
20 dispensers per case

N-DEX® 7705PFT

Powder-free, 4-mil, 9.5-inch, disposable low-modulus nitrile glove. **Accelerator-free formulation.**

KEY BENEFITS

- + Free from common accelerators found in nitrile gloves
- + Even lower risk of allergies
- + Increased visibility due to color
- + Chemical splash protection
- + Rolled cuff keeps debris out
- + Second-skin fit & feel

POLYMER Nitrile Low-modulus	THICKNESS 4 mil
LINER Disposable	LENGTH 9.5 inches
GRIP Bisque fingertips	COLOR Fluorescent green

PACKAGING

XS	S	M	L	XL
----	---	---	---	----

100 gloves per dispenser
20 dispensers per case

NITRILE

N-DEX® 9500PF

Powder-free, **5-mil, 11-inch**, disposable low-modulus nitrile glove. **Accelerator-free formulation.**

KEY BENEFITS

- + Free from common accelerators found in nitrile gloves
- + Even lower risk of allergies
- + Thicker barrier protection
- + Wrists are well protected
- + Increased visibility due to color
- + Second-skin fit & feel
- + Rolled cuff keeps debris out

POLYMER Nitrile Low-modulus	THICKNESS 5 mil
LINER Disposable	LENGTH 11 inches
GRIP Smooth	COLOR Fluorescent green

PACKAGING

XS	S	M	L	XL
----	---	---	---	----

50 gloves per dispenser
20 dispensers per case

N-DEX® 9700PF

Powder-free, **6-mil, 11-inch**, disposable low-modulus nitrile glove. **Accelerator-free formulation.**

KEY BENEFITS

- + Free from common accelerators found in nitrile gloves
- + Even lower risk of allergies
- + Thicker barrier protection
- + Wrists are well protected
- + Hides dirt and grime
- + Second-skin fit & feel
- + Rolled cuff keeps debris out

POLYMER Nitrile Low-modulus	THICKNESS 6 mil
LINER Disposable	LENGTH 11 inches
GRIP Bisque fingertips	COLOR Black

PACKAGING

S	M	L	XL
---	---	---	----

50 gloves per dispenser
20 dispensers per case

N-DEX® 9905PF

Powder-free, **6-mil, 11-inch**, disposable low-modulus nitrile glove.

KEY BENEFITS

- + Longer for extended protection
- + Thicker barrier protection
- + Decreased risk of allergies
- + Second-skin fit & feel

POLYMER Nitrile Low-modulus	THICKNESS 6 mil
LINER Disposable	LENGTH 11 inches
GRIP Smooth	COLOR Light blue

 6 dispensers per case

N-DEX®
8005/PF

8-mil, 9.5-inch, low-modulus nitrile disposable glove. Available lightly-powdered (8005) or powder-free (8005PF).

KEY BENEFITS

- + Chemical splash protection
- + Oil protection
- + Second-skin fit & feel
- + Retains tactile feeling
- + Lower allergy risk
- + Ambidextrous

POLYMER Nitrile Low-modulus	THICKNESS 8 mil
LINER Disposable	LENGTH 9.5 inches
GRIP Smooth	COLOR Light blue

PACKAGING

S	M	L	XL
---	---	---	----

50 gloves per dispenser
 20 dispensers per case

Disposable Terms to Note

Accelerator-Free

While nitrile gloves are free from natural rubber latex proteins a minority of individuals may still suffer from allergic reactions. SHOWA N-DEX gloves with accelerator-free formulation remove the common accelerators found in all disposable nitrile gloves, further reducing the risk of common workplace conditions like Type IV dermatitis.

Hypoallergenic

As defined by Meriam-Webster, hypoallergenic means a product has a reduced likelihood of causing an allergic response. Note, this does not mean that the product is allergy-proof.

Clean-processed

Used in clean-room or critical environments, clean-processed products must be free from particulates that could potentially contaminate the product or environment. The primary origin of particulates comes from human skin cells, followed by tiny fibers from clothing, hair from the head, body or eyebrows/lashes and traditional packaging. To remove these particles clean-processed gloves are washed in highly filtered deionised water, processed and packaged in a clean-room environment to prevent post-washing contamination. Instead of being packaged in cardboard dispensers like traditional nitrile disposable gloves, clean-processed products are packed in polybags to reduce contamination. (Source: CEMag.us)

Hand-specific

Due to their low-modulus formulation, all SHOWA N-DEX nitrile gloves will form to the hand within a short period; however, hand-specific gloves like 9005PF provide you with an even better fit. Instead of being designed to fit either hand, hand-specific gloves are molded to the unique curvature of each individual hand, increasing your comfort and dexterity, while reducing the chance of cross-contamination.

NITRILE

N-DEX® B6005PF

Powder-free, 4-mil, 9.5-inch, disposable low-modulus nitrile glove. **Clean-processed.**

KEY BENEFITS

- + Decreased risk of allergies

Quality Beyond Compare

Quality is woven into every fiber of our organization.

We have full control of our industrial ecosystem, enabling us to maintain constant quality and achieve perfection at every level. We perform every possible resistance test in our labs to ensure that each glove is fit for work before packaging and delivery. All of our production sites around the world are ISO 9001 certified and embrace our relentless pursuit of excellence.

[100%]

Integrated Manufacturer since 1951.

By owning all of our manufacturing, design and inspection processes, we create our own machinery, yarns, coatings, polymers and hand formers. This unchallenged level of control fuels our innovation process, resulting in unreplicable products and technology that gives us a significant advantage over our competition.

VINYL

2005/PF

Featuring a unique “stretch” formulation, SHOWA 2005 is a competitively priced disposable vinyl glove. Available in lightly-powdered (2005) and powder-free (2005PF).

KEY BENEFITS

- + DEHP free
- + Competitively-priced

CHEMICAL & LIQUIDS

[The Perfect Chemistry]

When it comes to chemical defense, SHOWA leads the pack. Our extensive range of chemical-resistant gloves are designed and tested to repel more than 300 individual chemicals, including acids, caustics, solvents, grease and oil. While the exterior coating of every glove creates an impermeable barrier, our liners absorb perspiration within—bringing you the pinnacle of protection and comfort.

NITRILE

NOTE: Chemical products are broken down in the following order 1) coating, 2) supported vs. unsupported, 3) length, then 4) ascending product number.

707

Blending the best of disposable and chemical resistant technology, this unlined, unsupported nitrile glove is the perfect hybrid for jobs requiring chemical performance plus optimum fit, feel and comfort.

KEY BENEFITS

- + Second skin fit & feel
- + Embossed tractor-tread grip
- + Impermeable for damp or greasy environments
- + "Slip-on" treatment
- + Hand-specific packaging

COATING Nitrile	LENGTH 12 in.
LINER Unsupported Unlined	THICKNESS 9 mil
GRIP Embossed	COLOR Blue

PACKAGING

6/XS 7/S 8/M 9/L 10/XL 11/XXL

25 pair per polybag
6 polybags per case

707FL

Blending the best of disposable and chemical resistant technology, this cotton-flock lined, unsupported nitrile glove is the perfect hybrid for jobs requiring chemical performance plus optimum fit, feel and comfort.

KEY BENEFITS

- + Second skin fit & feel
- + Embossed tractor-tread grip
- + Impermeable for damp or greasy environments
- + "Slip-on" treatment

COATING Nitrile	LENGTH 12 in.

1 dozen pair per polybag
12 polybags per case

NM11

Crafted using special ergonomically designed hand forms to reduce fatigue and enhance comfort, SHOWA NM11 is an 11-mil, unsupported, unlined nitrile glove that creates a barrier between you and a wide range of chemicals.

KEY BENEFITS

- + Flexible, low-modulus glove
- + Nitrile strength, durability and chemical resistance
- + Embossed tractor-tread finish
- + Vice-like wet & dry grip

POLYMER Nitrile	LENGTH 13 in.
LINER Unsupported	THICKNESS 11 mil

Leaders in Innovation

At SHOWA, we're always a glove ahead. Our technology has forever improved our industry, what our hands are capable of and the impact we make on our environment. Each year we push boundaries and create breakthroughs—like our Eco Best Technology®—which has led to the world's first biodegradable glove.

NITRILE

An industry-leader in chemical-resistant hand protection, these unsupported gloves are made from a special nitrile compound that is resistant to a broad range of solvents, oils, animal fats and other chemicals. The case-hardened finish enhances both chemical and abrasion resistance and makes donning and doffing easy while the bisque grip makes wet work easier and safer.

100% Nitrile. Available in a range of lengths and thickness.

379 [NEW]

Fit for fortitude in wet environments, SHOWA 379 creates a shield against oils and slippery liquids with a double-dipped nitrile coating. Endowed with an ultra-tactile foam grip and seamless liner, every pair enables hands to operate at peak performance without ever letting comfort or dexterity slip.

KEY BENEFITS

- + Excellent grip performance and prevents slipping
- + Flexible, robust glove
- + Great dexterity and good resistance to abrasion
- + Waterproof
- + Protection from chemicals, oils, hydrocarbons, benzines, grease & hexavalent chromium found in concrete
- + Mimics the curvature of a human hand to reduce fatigue

We Are SHOWA, the Industry's Chemical Hand Protection Leaders.

SHOWA® is known for being industry experts in chemical & liquid hand protective products. Our job is to protect workers who may be exposed to hazardous chemicals in the workplace. ASTM and EN 374 information from laboratory testing results are available to our customers.

Please utilize our chemical resistant data located on SHOWAgroup.com by clicking on ChemRest®.

Our hand protection is ranked in order of preference for ASTM Normalized Breakthrough Time and ranked with color-coded designations for easy interpretation based on EN 374 performance levels and ANSI/ISEA 105-2005 criteria for performance based selection criteria.

3415

SHOWA 3415 features a full neoprene coating with rough particle finish and 15-gauge seamless knit liner. This 14-inch gauntlet creates a defensive barrier between you and a range of chemicals without letting comfort or dexterity slip.

KEY BENEFITS

- + Flexible, consistent film coating
- + Protection against a wide range of chemicals, including acids, caustics, solvents, grease & oil
- + Seamless liner prevents irritation

Chemical Terms and Processes to note

Permeation

The process by which a chemical moves through protective clothing materials at the molecular level. The passage of a liquid or gas through protective clothing consists of three steps; absorption, diffusion and desorption.

Penetration

The process by which a substance moves through a closure, seam or pinhole in protective clothing on a non-molecular level.

Breakthrough Time

The number of minutes from initial contact with a test chemical until it is first detected on the inside of the protective clothing measured using sensitive analytical testing. It is essentially the number of minutes until your skin is exposed inside the gloves or other protective clothing.

Degradation

The deleterious change in one or more physical properties of a protective clothing material due to contact with a chemical. Degradation changes may include delaminating, discoloration, hardening, loss of tensile strength.

Concentration

The amount or mass of a constituent divided by the total mass of a solution. Normally all Organic Solvents tested in this site are 100%. Acids and Caustics are solutions in water. In permeation testing of acids, in particular, the concentration will affect the breakthrough time. More concentrated acids will permeate sooner than dilutions.

Heavy-Exposure

In permeation testing this term refers to constant total immersion of the protective clothing material in the test chemical which represents the worst type of heavy exposure. The ASTM F739 Test Standard and EN 374 European Test Standard refers to this type of exposure.

Intermittent Exposure

ASTM F 1383 Standard Test Method for Permeation of Liquids or Gases through Protective Clothing Materials under Conditions of Intermittent Contact. SHOWA used a contact time of 1 minute where the glove material was fully immersed and 9 minutes of purge time where the glove material was unexposed to the chemical which was repeated for 240 minutes.

PVC

753

Providing excellent abrasion resistance and protection from a broad range of chemicals, SHOWA 753 is a smooth-gripped, knit-wrist, PVC-coated glove.

KEY BENEFITS:

Premium fit and soft comfort

No irritation from seams on skin

SHOWA[™] ATLAS[®]

SHOWA[®] introduced the ATLAS line of products in the Americas in 1994. Years of painstaking Research & Development resulted in a revolutionary multi-purpose glove. The ergonomic design of this technology replicates the hand's natural curvature, thus eliminating hand fatigue. Moreover, this technological breakthrough dramatically improved the fit, feel and comfort of hand protection. The natural rubber latex flat-dip offers enhanced grip and abrasion resistance, which reduces injuries and creates a loyal following of this impressive family of products.

SHOWA is known for extensive investment in the creation of unique hand formers, and manufacturing processes that has set the bar in hand protection. This investment comes to life throughout of our product portfolio. SHOWA products are world-renowned for the aforesaid attributes and, as a result, many competitors strive to replicate SHOWA products.

**ALWAYS INNOVATING.
NEVER IMITATING.**

Zorb-IT® Technology

SHOWA has an extensive portfolio of products in multi-purpose and cut-resistance clusters that are coated with Zorb-IT® Technology. This sponge nitrile, flat-dipped coating absorbs grease and oil from the surface of the palm, allowing the user to maintain a strong grip even in the oiliest of conditions without sacrificing safety. All of our gloves coated with Zorb-IT® Technology are proudly made in the USA.

PROUDLY MADE IN
USA ★

4550

Crafted with a 15-gauge seamless knit and our high-performance, oil-resistant Zorb-IT® technology, 4550 absorbs oil and grease while still delivering a maximum long-lasting grip.

KEY BENEFITS

- + Absorbs almost 2x as much oil
- + Unparalleled dry & oil grip

CUT

[Perfection Cuts No Corners]

Equip your hands with SHOWA's highest degree of defense against cuts and lacerations. Engineered with Hagane Coil Technology, these gloves utilize the same high-quality, high-carbon steel used for centuries in constructing Samurai swords. Woven into the fabric of each glove, this stand-alone technology provides high-performance, heavy-duty armor for your hands, without compromising comfort.

S-TEX 303

A CUT ABOVE

Engineered with a natural rubber palm coating on a 10-gauge seamless, cut-resistant knit liner reinforced with stainless steel, Kevlar® and our patented Hagane Coil® technology, S-TEX 303 provides the highest degree of cut protection without sacrificing dexterity.

KEY BENEFITS

- + ANSI cut level 5
- + Superior cut resistance and mechanical resistance
- + Excellent wet & dry grip

Cut Tests Explained

E.g. Hypothesis.

To achieve ANSI/ISEA 105 cut-resistance performance level 4, a glove must withstand 1,500-3,499 grams. Let's say you specify a cut Level 4 glove in your facility. What is to stop someone from submitting a glove that barely surpasses 1,500 grams versus a glove that is 3,000 grams? Clearly both products would be considered ANSI cut level 4 gloves, but that's 2 times the cut-resistance! Would you really want to use these two gloves interchangeably?

This scenario can happen in most of the levels if the end-user is content on merely specifying the levels and not tuning into the gram score. The key advice is to compare gram scores and not cut levels.

ASTM F1790-05 / TDM 100

The ANSI/ISEA 105 cut performance levels are based on values obtained using the ASTM F1790 method. The latest ASTM standard for measuring cut resistance is the 2005 method (ASTM F1790-05).

In the ASTM F1790 test method, the sample is cut by a straight-edge blade, under load, that moves along a straight path. The sample is cut five times each at three different loads and the data is used to determine the required load to cut through the sample at a reference distance of 25 mm (1.0 in.) or 20 mm (0.8 in.).

The Cost of Injury

 **13.6%**

of all occupational accidents involve hand injuries, making them the most common type of injury besides back strains.

[\$6,000]

average claim per hand injury.

 **\$7,500**

average lost-time workers compensation per hand injury.

*Stats based on EMPLOYER-REPORTED WORKPLACE INJURIES AND ILLNESSES - 2012, released by the U.S. Bureau of Labor Statistics, Nov. 7th 2013

ARM PROTECTION

SHOWA's protective sleeves offer comfort, versatility and targeted protection for arms. Our sleeves are specifically designed in various lengths and materials to protect against cuts, abrasion, and heat. We also offer several gloves that have a protective, shoulder-length sleeve in our Chemical Resistant cluster of products.

SPECIALTY

[Static Suppressor]

Specialized duty calls for specialized defense—and SHOWA always has the right fit for the job. Our specialty gloves are customized with anti-static materials that prevent sparks and ignition in high-risk environments involving flammable materials.

240

Forged with flame and cut-resistant materials, SHOWA 240 is the ultimate armor for arc flash protection in high-risk industries. Featuring a 13-gauge seamless knit liner reinforced with Kevlar® and sponge neoprene palm coating inherently flame-resistant.

When it comes to safety, you get what you pay for. And when it comes to cutting costs, high-performance hand protection is always a safe investment.

SHOWA's Sentinel program provides customized safety solutions that help prevent work-related injuries and optimize your operation's cost performance. Proven to **reduce costs by up to 33 percent**, we'll give you a competitive edge by helping you get the most from your hand protection.

The Sentinel Advantage

- Improves Cost-Control
- Reduces Work-Related Injuries
- Consolidates Inventory
- Eliminates Waste
- Enhances Productivity
- Ensures Compliance with OSHA 29CFR 1910.132
- Comprehensive Assessments
- Customized Safety Plans
- On-Site Training
- First-class customer service

Sentinel's **5-Phase Methodology** is a holistic approach to optimizing your operation's safety and cost-performance.

Innovation makes sense when it actually contributes something useful.

Each time SHOWA develops a new concept, it improves wearer comfort and safety. This ability to anticipate needs and provide solutions that eventually become benchmarks is based on unrivaled technological expertise and is fully autonomous. This independence extends to developing our own hand formers, yarns, coatings, polymers and unique manufacturing process through inspection and packaging.

This gives us

100%

quality control at every level.

Our Philosophy

“Our mission is to protect workers needing hand protection whilst enhancing their ability to perform a multitude of tasks, keeping hands safe during and after work. SHOWA provides performing and durable innovative solutions thanks to a corporate philosophy of investing in research and development to introduce the next generation of innovative hand protection improving user comfort, premium safety and satisfaction.”

TERMS AND CONDITIONS

LIMITED WARRANTY & DISCLAIMERS

Showa Best Glove, Inc. (hereinafter “SHOWA”) terms and conditions apply and create a binding contract between Showa Best Glove, Inc. and its customer. SHOWA warrants only that gloves manufactured by SHOWA will be free from defects in materials and workmanship at the time of manufacture. This limited warranty expires one (1) year after shipment. This limited warranty is exclusive and in lieu of all other warranties, express, implied, or statutory. SHOWA's entire obligation and the exclusive remedy to any party for breach of this limited warranty shall be limited to replacement or refund of the original purchase price of the product, at SHOWA's option, and subject to customer's compliance with SHOWA's Returns policy. SHOWA's limited warranty shall not apply, however, to SHOWA gloves that have been subject to misuse, accident, or negligence during service, handling, or storage.

DISCLAIMER OF IMPLIED WARRANTIES

All implied warranties which may arise by implication of law or application of course of dealing or usage of trade, including, but not limited to, implied warranties of merchantability or fitness for a particular purpose, are expressly excluded. There are no warranties which extend beyond the description on the face hereof. The end user is solely responsible for the suitability of the glove selection for a particular application.

FORCE MAJEURE

SHOWA shall not be liable for delay in or failure to perform any of its obligations if the delay or failure results directly or indirectly by Force Majeure. “Force Majeure,” as used herein means any law, order, regulations, or government action; failure or delay of transportation; suspension or cancellation of any required license(s); insurrection, riots, national emergencies, war, acts of public enemies, strikes or other labor difficulties; inability to obtain necessary labor, manufacturing facilities, materials or components from SHOWA's usual sources; fires, floods or other catastrophes; acts of God or any cause of like or kind beyond our control.
