

Elavation Derrick Belly Pad

TS-7555BP

Issued: 5-4-08

7555BP Belly Pad shown with optional 7555 Derrick Harness

Application:

The 7555BP belly pad has been designed to be used with the SafeWaze 7555 Derrick harness as required to perform work tasks on drilling rig platforms.

- The belly pad is attached to the harness by connecting the two male-end quick connect buckles on the pad to the two female-end quick connect buckles on the front shoulder straps of the 7555 safety harness.
- A retaining rope is threaded through the two 4" securing rings on the front of the pad.
- The retaining rope is then anchored properly at both ends to a suitable anchor member on the drilling rig platform.

For detailed instructions regarding donning, fitting and adjustments of the safety harness, please refer to the harness instruction manual provided with the 7555 safety harness.

Specifications:

- Size: Universal
- Webbing: Polyester 9800 lbs min. tensile strength
- Hardware 5000 lbs min. tensile strength.
- Rated for 400 lbs maximum
- 2 each 3" securing rings on the pad for retaining rope pass through
